

## Maintenance that really works

Why you should choose a maintenance contract from VITARIS now.

Lots of devices. One partner. Zero worries. Our manufacturer-independent maintenance ensures safety, reliability and efficiency in your everyday laboratory work, whether for systems with critical applications, highly stressed equipment or devices with calibration or documentation obligations.

Unlike many manufacturers who only service their own brands, we provide maintenance for both in-house and third-party brands. Whether safety cabinets, refrigerators, freezers, or incubators – with our maintenance contracts, you can rely on the smooth and reliable operation of your equipment.

### Your benefits

- **Fewer outages, more availability:**  
Regular maintenance reduces unplanned disruptions by up to 20%.
- **Faster help in an emergency:**  
Contract customers benefit from shorter response times.
- **Transparency:**  
Clear maintenance packages without travel fees or hidden costs.
- **Investment protection:**  
Wear parts are detected in time, devices have been proven to run longer.
- **Regular calibration:**  
To ensure optimal long-term stability and measurement accuracy.

### Problem areas with insufficient maintenance

- **Calibration deviations:**  
Falsified results, risky wrong decisions.
- **Brittle seals and hoses:**  
Contamination and sample losses.
- **Worn bearings and belts:**  
Sudden failures of centrifuges and shakers.
- **Claimed filters:**  
Reduced safety in safety cabinets.
- **Dirty condenser filters:**  
Lead to compressor failures in refrigeration units.
