

More than just cooling – monitoring included

Cooling technology and monitoring as an integrated solution

When you purchase a PHCbi refrigerator or ultra-low temperature freezer (-80 °C or -150 °C), you will receive a free ELPRO ECOLOG-PRO 1TGe data logger, including access to elproCLOUD for 1 year.

This combines reliable cooling technology with a digital monitoring solution for temperature and alarms. Measurement data is automatically recorded, stored, and can be viewed online at any time.

Your advantages:

- **Continuous temperature monitoring**
The ECOLOG-PRO 1TGe accurately records temperature data and automatically transfers it to the elproCLOUD.
- **Real-time alerts**
In the event of temperature deviations, you will immediately receive a notification or SMS.
- **Documentation without manual effort**
Measurement data is automatically stored and available at any time for audits or internal quality assurance.
- **Greater security for valuable samples**
The combination of PHCbi cooling technology and ELPRO monitoring reduces the risk of temperature deviations.
- **Quick start to digital monitoring**
Installation and commissioning are carried out by VITARIS specialists.
