

More light. More safety. More future.

Replace the fluorescent lamps in your Labogene safety cabinet with sustainable LED lighting

The classic fluorescent lamp has had its day, even in your laboratory. VITARIS makes the changeover easy for you: with a manufacturer-matched LED kit for Labogene safety cabinets, you get a long-lasting, energy-efficient and mercury-free lighting solution that sustainably improves your working environment - both technically and organizationally.

Your benefits

- **Planning reliability instead of delivery frustration**
Fluorescent lamps are hardly available any more - secure a future-proof solution in good time and avoid the risk of failure
- **Energy efficiency that pays off**
LED light not only saves electricity, but also reduces heat generation in the working environment
- **More comfort**
Full luminosity, flicker-free light and optimized brightness - for ergonomic and safe working.
- **Perfect integration**
The LED kit is matched to Labogene workbenches by the manufacturer - for a custom-fit retrofit without technical compromises
- **Maximum operational safety**
The conversion is carried out by certified VITARIS service technicians with the highest quality standards
- **Longevity with a guarantee**
You receive a 3-year guarantee on the entire new lighting installation
