

Live Cell Imaging Roadshow

VITARIS
A Difference in Life Science

Seeing Science Clearly: One Workflow – Three Experts

Tools for Precise Cell Analysis

Experience how microscopy, microfluidics, and specialized cell culture labware can be combined to create powerful live cell imaging workflows.

The roadshow by VITARIS, ibidi, Nikon, and Witec showcases the latest technologies in practical use.

- April 28, 10:00 - 15:00 – Gastronomie Wagi S, Wagistrasse 12, 8952 Schlieren
- April 29, 10:00 - 15:00 – Superlab Suisse Biopôle, Rte de la corniche 6, 1066 Epalinges
- April 30, 10:00 - 15:00 – Campus Biotech Geneva, Chemin des Mines 7, 1205 Geneva

Highlights

- Live cell imaging workflows from cell culture vessels to image analysis
- Microfluidic systems and specialized labware for reproducible 2D and 3D cell models
- Fluorescence microscopy and contrast methods for precise observation of living cell cultures
- Demonstration of complete imaging setups and exchange with application specialists
